

CLAIMS

I claim:

5 Claim 1. A beverage container comprising a cylindrical body
having opposite respective top and bottom ends, said top end
being open, screw threads on said cylindrical body and
surrounding said open top end, a cap member having means thereon
threadingly engagable with the screw threads on said body, a
10 cylindrical cavity in said bottom end, said cavity being
disposed generally centrally of said cylindrical body and having
a first initial entry portion of selected diameter and a second
continuing elongate portion that projects a selected distance
into the interior of said container, said first initial entry
15 portion being of greater diameter than said second continuing
elongate portion and a heat transfer unit removably insertable
into said cavity for use in heat transfer contents contained in
said beverage container, said heat transfer unit comprising a
shell, of suitable material, confining therein a freezable or
20 heatable material, said heat transfer unit having first and
second contiguous cylindrical portions so dimensioned as to
inter-nest in said cavity it said container.

Claim 2. The beverage container and insert therefor as defined in claim 1 including means on said insert and means co-operating therewith on said container to retain said insert in said cavity.

5

Claim 3. The beverage container and insert therefor as defined in claim 1, wherein at least said elongate portion of said cavity is tapered decreasing a selected amount in diameter in a direction away from the bottom end of said container.

10

Claim 4. The beverage container and insert therefor as defined in claim 1, wherein each of said insert and cavity have cylindrical outer surfaces and wherein they taper decreasing a selected amount in a direction away from said bottom end of the container.

15

Claim 5. The beverage container and insert therefor as defined in claim 4 wherein said cavity and insert have corresponding mating tapers with the surfaces engaging one another when the insert is in it's in use position in the cavity.
